PermaGreen® Feed™

Premium foliar fertiliser to stimulate grass growth and nutrient uptake year round.

PermaGreen® Feed™ is a comprehensive fertiliser solution for your turfgrass. It is specially formulated to promote healthy growth. The fertiliser is made with high-quality ingredients including humic and fulvic acid and seaweed, to ensure that it provides balanced nutrition for the turfgrass. It can be used throughout the growing season to maintain healthy and vigorous turf.

PermaGreen® Showtime™

Enhance the lushness of your grass with our top-tier foliar treatment **PermaGreen® Showtime™**, devoid of nitrogen fertiliser yet enriched with Iron and Manganese.

This premium formulation aims to revitalise your grass and promote a vibrant green hue, offering exceptional assistance in achieving the lawn of your dreams.

PermaGreen® Restore™

Premium foliar fertiliser packed with macro and micro elements to restore grass health after abiotic and mechanical stress.

All-round fertiliser with macro, micro elements, trace elements, seaweed, and fulvic acid. This product is specially designed to provide a boost of nutrients to your turfgrass when conditions require it, such as after drought, winter, or excess rain. The addition of seaweed and fulvic acid enhances the nutrient uptake and utilisation, ensuring that your turfgrass gets the most out of the fertiliser. Use this **PermaGreen® Restore™** when you want to provide a comprehensive nutrient boost to your turfgrass.

PermaGreen® Energise™

Premium foliar fertiliser to boost growth, especially in colder weather or after a dormant period. Designed for excellent growth and nutrient uptake.

PermaGreen® Energise™ contains high-quality ingredients that provide plant nutrition, with a focus on nitrogen to promote growth and added Sulphur to improve the efficiency and effectiveness of the Nitrogen.

PermaGreen® Energise™ is available as a liquid or loaded on to a Zeolite granule. The granular version helps the CEC of the soil and provides a slow release of the fertiliser.

USAGE

For foliar application it is best to spray early in the morning or later in the day to avoid hot and direct sunlight.

TYPICAL CROPS	RATE	DILUTION	APPLICATION NOTES
Commercial Turf	200-500mls	per 5L	Spread over 50 - 100m ² Application rates vary by product
Residential Lawn	20-60mls	per litre	Spread each litre over 10m ² Application rates vary by product
