SUPPORTS
IMMUNITY

GOOD
BACTERIA

NO
ANTIBIOTICS

OPTIMATE™ KICK-START HELPS WITH:

- When an additional boost is required to kickstart the health of your dairy herd or flock.
- Help re populate good bacteria to the rumen after a antibiotic treatment or period of rumen stress

WHY USE OPTIMATE™ KICK-START ?

- Some of your girls may need a boost over challenging times, times of stress or taking medication.
- Optimate™ Kick-Start is designed with probiotics, vitamins and NZ zeolite in the form of Optimate™, an ACVM registered toxin binder.

DIRECTIONS FOR USE:

- Feed 5 grams per day per animal per day for recommended 5 day course.
- Recommend to be blended with 5 – 15ml of (unchlorinated) cold water and administered as an oral drench.
- Ensure there is fresh drinking water available.

HEALTH AND SAFETY:

Material safety data sheets are available on request.
