PRO GRO SERIES RTU

THE SMART FERTILISER FOR COOLER SEASONS

*Part of the **PROGRO SERIES** - Ready-To-Use liquid fertilisers that target seasonal challenges.*

Grow more in Autumn & early Spring. **COLDGRO™** is designed for farmers who want to extend pasture growth during cooler months - when traditional fertilisers struggle and supplementary feed gets expensive.

- **READY-TO-USE** No mixing, no guesswork
- **COLD WEATHER OPTIMISED** Designed for low soil temps
- **BALANCED NUTRITION** Nitrogen + Sulphur + Activated Kelp
- **EFFICIENT APPLICATION** Apply 20L per hectare
- **COMPATIBLE WITH GIBBERELLINS** Easily added if required

PERFECT FOR:

- Farmers wanting better pasture performance in cooler seasons
- Consultants and agronomists needing a proven RTU solution
- Anyone seeking a cost-effective alternative to expensive feed

**PROVEN
SCIENCE
REAL
RESULTS**

COLDGRO™ blends premium nutrients with smart plant science-ensuring your pasture stays productive, even in cooler, wetter weather.

LIMITED STOCK

First in, first served! Talk to your local **BPM** representative or contact us directly to secure your supply.

Proudly developed and manufactured in New Zealand.

WHAT MAKES COLDGRO™ DIFFERENT?

Precision Performance for Pasture in Cold Conditions

Optimised for cool climates COLDGRO™ works when traditional fertilisers fall short. Specially formulated for early spring and autumn use, it feeds your pasture when soil microbes slow down and nutrient uptake is limited.

THE SCIENCE BEHIND COLDGRO™

UAN (UREA AMMONIUM NITRATE)

- Immediate, mid-term, and slow-release nitrogen
- Fully soluble - no residue, no re-crystallisation
- Outperforms granular and dissolved urea, especially in cold soils

THIOSULPHATE SULPHUR (S₂O₃²⁻)

- Dual-action sulphur: quick boost + long-lasting effect
- Improves nitrogen efficiency by stabilising ammonium
- Fully liquid - won't clog sprayers

ACTIVATED KELP

- Natural antioxidant support in cold and wet conditions
- Enhances stress resilience for pasture under pressure
- Mobilises nitrogen for better nutrient uptake and growth response

GIBBERELLINS CAN BE ADDED IF DESIRED

- Easily mixed into the tank for farmers wanting to boost early growth

LET'S GROW TOGETHER TAKE THE GUESSWORK
OUT OF COOL-SEASON GROWTH.
