PRO GRO SERIES RTU

JUST ADD  
WATER

PRECISION  
APPLICATION

SPECIFICALLY  
FORMULATED

## THE RIGHT START FOR PASTURES - RTU LIQUID FERTILISER FOR POST- GERMINATION.

Delivers essential nutrients at the right time  
for fast growth and strong roots. No mixing -  
just confidence in a complete solution.

USE | READY TO USE | READY TO USE | RE

SPECIALLY FORMULATED FOR  
GROWTH IN AUTUMN TEMPS

## YOUR ECONOMIC ADVANTAGE

- **Higher Yield** – Maximises pasture productivity.
- **Faster Growth** – Speeds up establishment.
- **Stronger Roots** – Enhances nutrient access and moisture retention.
- **Greater Resilience** – Reduces grazing losses.
- **Healthier Soil** – Supports microbes and soil fertility.
- **Lower Nitrogen Use for Sustainability** – Optimised nitrogen efficiency reduces overall N application, helping to lower your carbon footprint and qualify for Fonterra's premium payment incentives in 2025/26.

## HOW IT WORKS

**NZ Made UAN Formulation –**  
**Three nitrogen forms for foliar uptake:**

1. **UREA** – Fast leaf absorption, converted to ammonium.
  2. **AMMONIUM (NH<sub>4</sub><sup>+</sup>)** – Instant uptake, drives protein synthesis.
  3. **NITRATE (NO<sub>3</sub><sup>-</sup>)** – Boosts chlorophyll and energy conversion.
- **Balanced NPKS** – Fuels photosynthesis, cell growth, and root expansion.
  - **Fulvic Acid** – Enhances nutrient transport, enzyme activation, and uptake.
  - **Fish Hydrolysate** – Provides amino acids for protein synthesis and stress resistance.
  - **Precision Formulated** – Eliminates nutrient imbalances, reducing metabolic stress.
  - **Ready-to-Use** – Maximises efficiency with no additional processing.
