PRO GRO SERIES RTU

PRECISION NUTRIENTS, EXACTLY WHEN NEEDED

*Fast-growing spring pasture looks lush, but often lacks the protein, minerals, and energy animals need. **SPRINGGRO™** is a ready-to-use liquid fertiliser that feeds quickly through the leaf to sustain growth and boost feed quality.*

With NPKS, bio-stimulants, and trace elements, **SPRINGGRO™** keeps pastures dense in protein, minerals, and energy.

SPRINGGRO™ is designed for mid-to-late spring, when rapid pasture growth can dilute nutrient density.

Applied at 20L/ha, it delivers nitrogen, phosphorus, potassium, sulphur, trace elements, and bio-stimulants directly to the leaf - sustaining growth and maintaining feed quality.

**PROVEN
SCIENCE
REAL
RESULTS**

KEY FEATURES:

- Balanced NPKS + bio-stimulants for sustained spring growth
- Enhances feed quality under rapid growth conditions
- Foliar application = fast uptake, minimal nutrient losses
- RTU formulation for simple, accurate farm use

NO COMPLEX BLENDING NO WASTED NUTRIENTS

THIS PRODUCT IS FOR:

- Dairy farmers optimising spring pasture quality and yield
- Sheep and beef operations improving nutrient profile
- Contractors applying foliar nutrition for grazing systems
- Mixed farming enterprises with pasture and forage crops

KEY BENEFITS

- **Maximised Growth:** Foliar uptake sustains peak growth rates in spring
- **Enhanced Nutrient Density:** Supports protein, minerals and energy content
- **Reduced Nutrient Loss:** Less leaching vs soil-applied fertiliser
- **Optimised Plant Function:** Macro and micro nutrients fuel photosynthesis and resilience
- **Easy Integration:** Works seamlessly in spray programs

SUPPORTING SCIENCE - WHY LIQUIDS WORK IN SPRING SYSTEMS

- **Rapid Response:** Fast foliar absorption of N, P, K, S
- **Nutrient Efficiency:** Lower nutrient volumes for same effect
- **Reduced Environmental Losses:** Foliar avoids leaching and fixation
- **Improved Feed Value:** Maintains protein and minerals in lush spring growth

INGREDIENTS:

Micronutrients & Bioactive Package:
UAN, Potassium, Phosphorus, Boron, Calcium, Cobalt, Copper, Iron, Magnesium, Molybdenum, Selenium, Sulphur, Iodine, Zinc, Nickel, Manganese, Activated Kelp, Fish Hydrolysates, Fulvic, Molasses.

DIRECTIONS FOR USE

Apply 20L/ha with 130L water minimum (150L total recommended).

Best used:

- Mid - late spring rapid growth
- To sustain nutrient density in lush pastures
- In grazing systems for dairy, sheep and beef

COMPATIBILITY:

- Suitable with most spray programs
- Can be tank-mixed with crop protection products for single-pass application

PACK SIZE:

200L | 1000L
