

# PRE-LAMBING MINERAL MIX FOR A **HEALTHER START**

### OPTIMATE™ SHEEP ENERGISE HELPS WITH:

Providing essential mix of minerals for transition period to lambing including additional requirements to transfer to growing lambs.

#### WHY USE OPTIMATE™ SHEEP ENERGISE?

- Because it includes NZ natural zeolite in the form of Optimate™ which is an ACVM Registered toxin binder.
- Its specifically formulated to meet the needs of high producing milking sheep.
- Created in a dispersible granule for easy distribution in concentrate or forage feed
- B1 (to combat Thiamine deficiencies due to hìgh grain diets

## **DIRECTIONS FOR USE:**

- Feed 60 grams per sheep/per day.
- Recommend to start feeding 6 to 4 weeks before lambing - not to be fed postlambing

## **HEALTH AND SAFETY:**

Material safety data sheets are available on request.
