

POST LAMBING HIGH-PERFORMANCE FEED MINERAL

- Probiotics for rumen health
- Toxin binding and rumen buffering
- Essential trace elements for healthy animals

WHY USE OPTIMATE™ SHEEP POWER UP?

- Because it includes NZ natural zeolite in the form of Optimate™ which is an ACVM Registered toxin binder.
- Probiotics provide good bacteria to maintain gut health. CLOSTAT produces a specific biocide in the gastro-intestinal tract that has **inhibitory activity against Clostridium perfringens**
- Magnesium, calcium and phosphorus for lactating dairy sheep with added Biotin, Thiamine and Zinc Methionine for peek health and production

DIRECTIONS FOR USE

- Feed Optimate™ Sheep Power Up is a loose mineral suitable to be fed via meal blend or as a free access loose lick. Not designed to be fed inshed feeder.
- Feed 60 grams per sheep/per day for high producing sheep
- Not to be used with other sources of selenium without veterinary recommendation.
- Designed to be fed to lactating dairy sheep

HEALTH AND SAFETY

Material safety data sheets are available on request.

WHAT IS OPTIMATE™ SHEEP POWER UP?

- Optimate[™] Sheep Power Up has a special blend of macro minerals designed to help your dairy sheep performance during lactation.
- Optimate™ Sheep Power Up has the added benefit of Kemin® CLOSTAT® probiotics. macros, trace elements and vitamins. Kemin has identified and selected Bacillus subtilis PB6 as an active substance that helps maintain the balance of microflora in the intestinal tract of livestock. This helps with the maintenance and productivity of healthy animals.
- Optimate™ Sheep Power Up has the added benefit of Biotin. Thiamine. ZinMeth as well as Vitamin A, E and D3. Designed for high producing sheep on high grain diets.
