DIRECTIONS FOR USE

- Feed **Optimate™ Sheep Protect** is a loose mineral suitable to be fed via meal blend or as a free access loose lick. Not designed to be fed in-shed feeder.
- 60 grams per day per sheep, per day for high producing sheep
- Designed to be fed to lactating dairy sheep
- **Not to be used with other sources of selenium without veterinary recommendation.**

HEALTH AND SAFETY

Material safety data sheets are available on request.

- Do not exceed the recommended dose rate. Knowing animal liveweight is important as for zinc to be effective it needs to be administered at 2.75g of Zinc Oxide per 100kg liveweight
- For best results start regular Zinc treatment two weeks before conditions normally occur until cooler winter conditions (Dec to April)

INGREDIENTS

Optimate™ ACVM Registration Number A011800.
